**Rx360:**

Nic Cogdall and Raul Munoz, Pima County Health Department, provided the group with an overview of the Rx360 Toolkit, which provides both youth and adults information on substance misuse. Historically, the Community Awareness Action group has provided trainings to community members on how to deliver the training and has coordinated with schools to deliver the curriculum to middle and high school students.

While the base content of the Rx360 presentation remains consistent, organizations that provide the presentation can tailor the content to fit their audience. Raul and Nic noted that this is an opportunity to educate individuals using the most up to date Pima County-specific data and resources, including the [Pima Helpline](#). If all Action Group members are using this data, it helps to ensure consistent messaging throughout the community. Raul shared that the Pima County Health Department is working on identifying where to provide the training

**Prescription Drug Take-Back Event:**

Raul provided the group with an update on the recent prescription drug take-back event on August 19<sup>th</sup>. The event was part of a partnership between the Pima County Sheriff's Department and the Health Department and resulted in over 65 lbs. of pills and capsules being collected. Raul also encouraged the Action Group to participate in the National Take Back event taking place on October 26<sup>th</sup>, locations to be determined.

**Partnership with CPC**

The Community Awareness Action Group is pursuing a partnership with the Community Prevention Coalition. Additional details about this partnership will be shared as they emerge.
